

Video Module for Jive

High-Impact Video Sharing for Jive Communities

When it comes to impact, nothing communicates like video. Yet enterprises have lagged in providing tools that allow employees to easily create and share video in secure corporate environments.

Jive's Video Module makes it simple to add great videos to your Jive community. Whether it's an executive video blog, a training video from HR, a product demo from Marketing or a technical tutorial from IT, users across your organization can quickly create, collaborate on and consume video from any device. With a rich full-screen layout and HD-quality experience, the Jive Video Module lets you serve up a library of categorized content, channels or blogs. The result: a more informed and knowledgeable work force and lower costs on training and support.

Watch, Connect and Collaborate

Jive serves up video in a wide-screen format that's perfect for web consumption and automatically re-sizes for streaming to mobile devices on HTML5 and iOS apps. Users can rate, like, bookmark, add comments and even chat with "who's watching now" using Jive's real-time capabilities.

The screenshot displays the Jive Video Module interface. At the top, there's a navigation bar with 'Home', 'Content', 'People', 'Places', and 'Apps'. Below this, a video player shows two men in suits sitting on blue chairs. The video is titled 'Sales TV - Episode 3' and was posted on Jan 3, 2013, by Jeff Glass. The description includes a link to the Sales Resource Center and mentions a Strategic Growth Town Hall Discussion. The video has 13 views and is categorized under 'Presentations'. Below the video, there's a rating section showing an average user rating of 4.5 stars and a 'My Rating' of 'Above Average'. A chat window is open, showing a conversation between Stephen Grisman and Jeff Glass. The chat messages are: 'Team, what are your thoughts on this new direction? We need to include Sales TV - Episode 3', 'You - Today at 11:34 AM', 'That sounds great, what about using the J2000 Playbook. Steps ??', 'Jeff Glass - Today at 11:34 AM', and 'Agreed, lets move forward Stephen Grisman - Today at 11:34 AM'. The interface also includes options to follow, share, bookmark, like, and edit the video.

Capture, Curate and Contribute

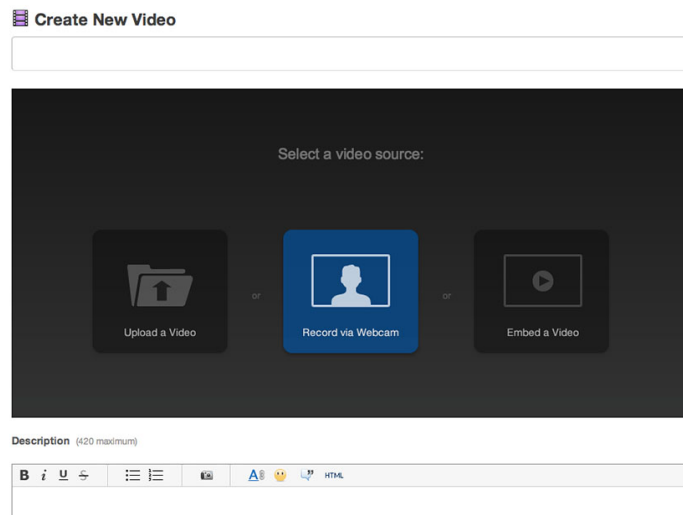

It's never been easier to create video. With a few clicks, you can access your computer's webcam, an external video cam or your phone's camera (using Jive's elegant mobile apps), then record and upload your video to Jive. You can also embed videos from hundreds of popular sites like YouTube or Vimeo by simply pasting the video link. When posting a description of the video, you can @mention other content and resources, providing a one-stop overview of a topic. And it's easy to find videos via categories and tagging in Jive spaces and groups, which can act as video channels. You can even embed videos in any document or discussion.

Premium Video Experience

- Plays any video format supported by HTML5 browsers or Adobe Flash Player
- Reverts to HTML5 for non-Flash enabled browsers and mobile
- HD playback in both hardware-accelerated and application-rendered modes
- Support for progressive and streaming videos
- Scales to any size and retains a fixed 16:9 aspect ratio
- Automatically resizes to fit larger or smaller areas
- Supports viewing and creation via Jive mobile apps

Compatibility

Jive's Video Module is compatible with the following products and versions:

- Jive Cloud, Jive Custom 6.0 and above
- Jive-x Cloud, Jive-x Custom 6.0 and above

Licensing

This module is a paid module, but is included in the following packages:

- Jive Cloud Essentials
- Jive Cloud Essentials (allows you to use a proprietary video player)

If you have any further questions please contact your Jive account representative or email us at sales@jivesoftware.com. In addition, you can find information and discussions about the module in our community at community.jivesoftware.com.
